

### Lesson overview of the baby class

- Studies show that babies can decipher grammar by seven months and can distinguish between languages in the womb\* (see below).
- Our classes are formulated to introduce babies to new sounds and enable them to get familiar with the Spanish language from birth.
- Our sessions are designed for you to spend one on one time playing with them, singing to them, giving them your full attention whilst teaching them a new language
- Our sessions will follow the main class theme with practical language you can use during each game or social interaction.
- Your baby will experience movement, dance, sings, games and have fun.
- The tutor will demonstrate moves and actions with her demonstration doll.
- You know your child and if there is something you think they may not be ready for then modify or sit it out. Your tutor is a qualified baby massage instructor and Spanish teacher and will use her teaching experience to ensure your baby feels comfortable.
- We will use colourful props, scarves, parachutes and bubbles to give your baby a marvellous journey learning traditional Spanish nursery rhymes and games and when they are older they will progress into the older class where they will know many of the songs and games which will be supplemented with older games, crafts and stories.
- Learning languages is a journey and much will depend on how often you use it and practice at home. We hope to provide you with the tools to do that at home. We use baby signing, gestures and props so you will never be lost in a class.
